

Lesson planning microteach

ITTECF 4.

Recall activity

- Construct a table of with three columns and 20 rows. Column 1: Write the title of the lecture you have had thus far.
- In column 2 put a tick if you are going to consider your learning from that activity in your microteach lesson plan (otherwise put a cross).
- In column three, explain how

Your table should look like this

title		
What is science		
Models		
Retrieval practice		
Working memory		
Purposeful practicals		
Practical work		
Simulations		
BEST		
Literacy in science		

Download the Lesson plans and resources from the microteach folder and Moodle.

- Answer the following prompt questions
- Choose two different 10-minute activities in the lesson
- What is your thought about how much the teacher is trying to cover in ten minutes?
- What do you think about what the relative weighting of what the teacher is doing vs their pupils?
- How do these reflections inform what you will include in your lesson plan?

Download the lesson resources and feedback sheets from moodle

- Look at each of the feedback sheets.
- What were the strengths of the lesson?
- What were the limitations? Is there anything that surprised you? E.g. if the trainee was told they used the 10 minutes well, did what they covered (number of slides/activities) surprise you?
- How did the lesson plan enable the teacher to model these strong points? For example, if the teacher got positive praise for their use and range of questioning, was this because the questions were pre-planned?
- How will this inform what you do in your microteach?

Revise your lesson plan and resources

- A reminder, please upload all resources by Tuesday, 16th September. If you wish to order anything, e.g. whiteboards, etc, or want to have any resources photocopied, please make sure you order these by the close of play today, 15th September.
- This would include
 - Mini whiteboards
 - Any photocopying
 - Any chemicals etc- please note if you are using chemicals please check with technicians that we have these in stock and also ensure that you have completed the necessary risk assessment and submitted this to me.
